## EXPERIENCE

### Arzkaro

Dec. 2025 – Jan. 2026

#### Full-Stack Developer (Freelance Project)

Remote

- Architected full-stack platform for mobile application and website specializing in event and trip bookings with **5+ user roles**.
- Engineered authentication system with role-based access control (RBAC) to manage **3 user personas** and complex booking workflows.
- Integrated **10+ RESTful API endpoints** with React Native and web frontend components; optimized backend for seamless data sync.
- Repository: [github.com/itisrohit/arzkaro](https://github.com/itisrohit/arzkaro)

## PROJECTS

### Outlyne

- Developed zero-shot sketch-to-image search engine using SigLIP2 and OpenVINO, achieving **92ms inference** and **12ms** concept mapping on consumer hardware.
- Engineered asynchronous image retrieval pipeline with **15 concurrent connections**, reducing total search latency to **3.2 seconds**.
- Built vector-based re-ranking system using **768-dimensional embeddings** and cosine similarity to filter **20-50 candidate images** by visual relevance.
- Source: [github.com/itisrohit/Outlyne](https://github.com/itisrohit/Outlyne)

### Base0

- Built type-safe Backend-as-a-Service platform with Bun and Hono, implementing **4 core primitives** (auth, data, storage, access control) and **8 management interfaces**.
- Architected multi-tenant PostgreSQL schema with **12+ tables**, JSONB collections, supporting **6 RBAC roles** and scoped API key authentication.
- Achieved **33+ integration tests** covering authentication flows, role-based access control, and storage operations with Docker-based CI/CD.
- Source: [github.com/itisrohit/base0](https://github.com/itisrohit/base0)

### AI Hackathon

- Competed among **50+ teams** in university-level AI hackathon, collaborating in a **4-member** cross-functional development team.
- Developed full-stack AI solution within **48-hour** timeframe, implementing backend services and API integrations for real-time data processing.
- Presented technical solution to judging panel, demonstrating system architecture and deployment strategy.

## EDUCATION

### Lovely Professional University (LPU)

July 2024 – Present

#### B.Tech in Computer Science & Engineering (Software Product Engineering)

India

- **Academic Standing:** 9.67 CGPA

## SKILLS

**Languages :** JavaScript, TypeScript, Python, SQL, HTML/CSS

**Frameworks/Libraries :** Node.js, Bun, React, React Native, Hono, Express, Next.js, TailwindCSS

**Databases/Tools :** PostgreSQL, MongoDB, Redis, Git, Docker, GitHub Actions, REST APIs, JWT, OAuth
